Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-13, and 15-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin (6,386,551).

Martin discloses a boot seal and a method of making a boot seal having an inner 20 and outer 22 layers. The seal has a first end 14 and second end 16 with a wall extending therebetween. The wall comprises the dual layers 20 and 22. The seal can be made by dual injection or blow molding. The layers are made from elastomers (rubbers or thermoplastics) wherein the inner layer is resistant to grease and the outer layer resistant to ozone. The boot can comprise a compliance layer 24 between the inner and outer layers.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin.

Requiring the inner and outer layers to be made from HNBR and EPDM rubber is considered a design choice. The selection of a known material based on its suitability for its

Art Unit: 3676

intended use is not considered inventive. See *In re Leshin* 125 USPQ 416 (CCPA 1960).

Further it is known to use HNBR and EPDM in sealing boots as evidenced by Gerulski, Hempel, and Houseman. Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to make the inner and outer layers from HNBR and EPDM rubber as a matter of choice in design.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
